

# RECOVERY MADE SMARTER

We connect patients and providers with advanced, non-invasive medical technologies that improve quality of life, reduce pain, and accelerate healing. Through TENS/NMES, Cold Compression, and Red Light Therapy solutions, we offer safe and effective options to support recovery every step of the way.

**SMART  
SOLUTIONS  
BETTER  
OUTCOMES**

At United Pain Devices, our non-invasive medical technologies enhance the quality of life for patients with functional disabilities or chronic pain. Our advanced TENS/NMES Therapy, Cold Compression, and Red Light Therapysolutions provide safe, effective alternatives for managing pain, reducing inflammation, and accelerating recovery.

## Our Devices

Cold Compression

TENS/NMES

Cold Compression Wrap  
Pro Pump

## Our Bread and Butter

### Cold Compression

Targeted cold therapy with active compression to reduce pain, swelling, and inflammation while speeding up recovery.

### TENS / NMES

Drug-free pain relief using gentle electrical stimulation to reduce muscle tension, improve circulation, and restore mobility.

### Red Light Therapy

Non-invasive light therapy that reduces inflammation, relieves pain, and accelerates cellular healing.
